

USER MANUAL

> INTALLATION & LAUNCH

GITHUB

Game Server

<https://github.com/reohsgw/game-server.git>

Game Client

<https://github.com/reohsgw/game-client.git>

Requirements

Before running the game, make sure the following software is installed:

- Unity
- Java 17 or later

Step 1 — Start the Server

1. Open the **game-server** project from the **main** branch in your IDE, such as VS Code.
2. Run **GameServerApplication.java**.
3. After the application starts successfully, the server will run at: <http://localhost:8080>

Step 2 — Launch the Game

1. Open the game client project from the **main** branch in Unity Editor.
2. Open the **RegisterScene**.
3. Press the Play button in Unity Editor to start the game.

The server must be running before launching the game. If the server is off, login, progress saving, leaderboard, and recipe loading will not work.

> HOW TO PLAY?

1. Register

- Enter an ID, email, and password
- Press Register — you will be taken to the login screen

2. Login

- Enter your registered ID and password
- Press Login to enter the game

3. Main menu

- Your player ID and best score are displayed on screen
- Press START to go to stage select
- Press Character to change your character
- Press Leaderboard to view all player rankings
- Press God mode to use the cheat (unlock all levels)
- Press Sound to control the music volume
- Press Story to check the story of the game!

4. Stage select

- Omurice (Japan) is unlocked by default
- Bibimbap (Korea) unlocks after completing Omurice
- Rendang (Indonesia) unlocks after completing Bibimbap

5. Market scene

- Walk around the market using WASD or arrow keys
- Press E near an ingredient to collect it
- Collect all required ingredients before time runs out
- Pick up energy drinks to restore hungriness (will add 2 blocks)
- Press the Recipe Book button to view ingredients and steps

6. Cooking scene

- Press Start to begin
- Click the correct ingredient buttons in order
- For stirring and folding steps press Ready then hold or tap SPACE to control the meter
- Keep the pointer in the green zone for the highest score
- Wrong ingredients deduct 10 points

7. Result screen

- Your score is shown as stars
- Press Confirm to return to stage select

> CHEATS

- God Mode

How to activate: Press the God Mode button on the main menu

Effect: Unlocks all three stages immediately.

- H2 Console

Go to <http://localhost:8080/h2-console> in a browser to view and edit the database directly. (useful for resetting scores or checking saved data)
